DER APPLICATION EVALUATION TECHNICAL CRITERIA
Delegated Functions & Authorized Areas

? Applicant indicates requested area(s) of delegation and attaches supporting data to establish technical expertise and experience.
? Advisor (**Adv**) evaluates requested area(s), recommends area(s) to Evaluation Panel (**EP**). (Y=YES; N=NO) and provides rationale.
? Evaluation Panel evaluates area(s) recommended by Advisor, marks **EP** column. (Y=YES; N=NO) and provides rationale.

DER APPLICANT USE ONLY		*FAA USE ONLY*	
Requested Areas	**DETAIL DESIGN**	**Adv**	**EP**
	1A Controllable Pitch Propellers		
	1B Fixed Pitch Propellers		
	1C Special (Specify)		
Requested Areas	**BLOCK TESTS**	**Adv**	**EP**
	2A Controllable Pitch Propellers		
	2B Fixed Pitch Propellers		
	2C Special (Specify)		
Requested Areas	**PERFORMANCE CHARACTERISTICS**	**Adv**	**EP**
	3A Controllable Pitch Propellers		
	3B Fixed Pitch Propellers		
	3C Special (Specify)		
Requested Areas	**VIBRATION ANALYSIS**	**Adv**	**EP**
	4A Controllable Pitch Propellers		
	4B Fixed Pitch Propellers		
	4C Special (Specify)		
Requested Areas	**OPERATION MANUALS**	**Adv**	**EP**
	5A Controllable Pitch Propellers		
	5B Fixed Pitch Propellers		
	5C Special (Specify)		
Requested Areas	**OVERHAUL MANUALS**	**Adv**	**EP**
	6A Controllable Pitch Propellers		
	6B Fixed Pitch Propellers		
	6C Special (Specify)		
Requested Areas	**SERVICE DOCUMENTS**	**Adv**	**EP**
	7A Controllable Pitch Propellers		
	7B Fixed Pitch Propellers		
	7C Special (Specify)		
Requested Areas	**EXHAUST EMISSIONS EVALUATION**	**Adv**	**EP**
	8A Turbine Engines		
	8B Piston Engines		
	8C Special (Specify)		
Requested Areas	**SOFTWARE**	**Adv**	**EP**
	8A Controllable Pitch Propellers		
	8C Special (Specify)		

Additional requirements for a DER with a delegation of Software Approval:

Circle One

Yes No (a) Comprehensive familiarity with, and understanding of, RTCA Document DO-178 (applicable revision), Software Considerations in Airborne Systems and Equipment Certification.

Yes No (b) Familiarity with the systems safety assessment process, specifically, those portions which establish the software criticality levels.

Yes No (c) A demonstrated knowledge of the rationale for, and the significance of, each stage in the software development process, as well as its supporting standards, procedures, and documentation. The DER should be able to identify the critical aspects and contents of each of the documents mentioned in DO-178.

Yes No (d) Experience gained from participation in some technically responsible capacity over a complete software development program life cycle. This qualification may be satisfied by an aggregate over several different software development programs.

Yes No (e) Experience interacting with all phases of software development and testing processes addressed by DO-178, including utilization of the associated configuration and quality control procedures. This experience should include significant responsible involvement in several of those phases. When assessing an applicant's capabilities for making a knowledgeable finding of compliance, experience obtained in the requirements development or testing phases may, for example, be weighted more heavily than that obtained in the detail design or coding phases.

Yes No (f) Fluency in at least one high-level and one assembly-level programming language and familiarity with typical support software used in a software development process. Familiarity with typical software tools available to facilitate the development, documentation, and consistency-checking processes is highly desirable.

Yes No (g) Demonstrated knowledge of the sources of software anomalies, the relative merits of the types of testing procedures which are available to protect against them, and the characteristics of a thorough test program.

Yes No (h) Familiarity with the aspects of computing peculiar to real-time avionics systems, such as the use of interrupts, multi-tasking, software reentrancy, etc. This should include an appreciation of the types of analysis and testing necessary to ensure the integrity of these mechanisms.

Yes No (i) An understanding of the techniques which may be employed to reduce software criticality levels, such as system architecture, multi-version programming, and partitioning. This should include the ability to assess the adequacy of a proposed technique relative to the integrity credit desired.

Yes No (j) Knowledge of hardware characteristics such as input/output schemes, memory organization and multi-port access, communication-bus protocols, and processor architecture, all of which have an impact on the software interface and the potential for the creation of anomalies.
